MANDIANT Aims To OPEN And FACILITATE DIALOGUE About CYBERSECURITY

EFFECTIVE PROGRAMS TO PREVENT THREATS

PARIS - SILLICON VALLEY - LOS ANGELES, 07.08.2023, 06:02 Time

USPA NEWS - According to Mandiant, 98% of French Decision Makers believe that Cyber Decisions are made without Knowledge of the Attacker at least half the time A Global Survey of cybersecurity Decision-Makers reveals the Reality of Corporate Cybersecurity... What about French Companies?

According to Mandiant, 98% of French Decision Makers believe that Cyber Decisions are made without Knowledge of the Attacker at least half the time A Global Survey of cybersecurity Decision-Makers reveals the Reality of Corporate Cybersecurity... What about French Companies?

Mandiant Inc. today unveils the French Results of its Global Perspectives on Threat Intelligence Report which provides New Insight into how French Companies are navigating an Increasingly Complex Threat Landscape The Reputation is based on a Global Survey of 1,350 Cybersecurity Decision Makers in 13 Countries and 18 Business Sectors including Financial Services, Healthcare and Administration.

- The French face new challenges

Despite the General Belief that it is Important to understand the Hackers who might target their Organization, 79% of Respondents said their Organizations make the Majority of Cybersecurity Decisions Without Knowing the Attacker who is targeting them.

In France, almost all (98%) of Respondents believe that the Decisions made in Terms of Security within their Organization are made at least Half the Time without Knowing the Threat Actors who could target them. Moreover, 69% of French Decision-Makers say they are concerned "that their Organization is missing out on Real Threats/Incidents due to the Amount of Alerts and Data it is confronted with.

Although the Report found that almost all (98%) of French People were satisfied with the Quality of Threat Intelligence used by their Organization, they said that the Effective Application of this Intelligence across the Organization of Security was one of their Biggest Challenges (55%). Additionally, almost all (94%) of Respondents said they need to be Faster in Implementing Changes to their Cybersecurity Strategy based on Available Threat Intelligence.

- The French Underestimate the Threat

According to the Survey, 61% of French Cybersecurity Decision-Makers believe that Senior Management Teams still underestimate the Cyberthreat facing their Organization, while more than Two-Thirds (67%) agree that their Organization needs to improve its Understanding of the Cybersecurity Threat Landscape.

However, despite these Concerns, French Security Decision-Makers remain Optimistic about the Effectiveness of their Cyber Defenses. When asked about the Confidence they have in preparing their Business to defend against Different Cybersecurity Events, French Respondents feel most Confident in fighting Financially Motivated Threats, such as Ransomware (89%), followed by those carried out by a Hacktivist Actor (90%) and a State Actor (83%).

In Addition, just over Half of Respondents in France (55%) believe they can prove to their Management Team that their Organization has a Very Effective Cybersecurity Program. But according to the Study, 40% of French Decision-Makers believe that their Organization does not have a Sufficient Budget to keep abreast of the Latest Threats.
